# Microsoft Dynamics 365 Business Central and Vena

The **Vena Microsoft Dynamics 365 Business Central Connector** is a purpose-built native integration between the Vena Intelligent Complete Planning Platform and the Microsoft Dynamics 365 Business Central ERP.

It **seamlessly integrates** Business Central financial data into a **unified, collaborative platform** that combines category-leading CPM capabilities with a **scalable, flexible analytical data model**, embedded AI capabilities and **native integrations with Microsoft 365 productivity tools**.

By combining Vena with Microsoft Dynamics 365 Business Central an **integrated solution for Complete Planning is created** - without leaving the Vena ecosystem.

- Get started quickly with a simple **set up that you can manage yourself**, no third parties required.
- **Easily push large volumes of financial data from Microsoft Dynamics 365 Business Central into Vena** according to a schedule that works best for your business
- Take control of your Business Central data and **drive optimal performance with automated data loads**.
- **Unlock the potential in your Business Central Data** with the Vena, the only intelligent platform for Complete Planning that's natively integrated with Excel and Microsoft 365.
- **Generate fast results** with your Microsoft Dynamics 365 Business Central Data, Vena Quick Start and the right planning foundation for your business.

## Drive Optimal Performance With Automated Data Loads

---

Powered by the **connector's direct API integration**, data loads are fast and reliable, empowering you to **quickly and easily map large volumes of curated general ledger and trial balance data** from Microsoft Dynamics 365 Business Central.

## Get Started Quickly, No Third Parties Required

---

Get up and running in no time with **data feeds that are easy to set up with straightforward steps** you can manage yourself. Simply install the connector extension in your Vena Microsoft Dynamics 365 Business Central Connector instance, and authenticate to Business Central in Vena.

## Generate Fast Results With Your Business Central Data

---

Get up-and-running and **start generating results in no time** with a **prescriptive, Quick Start solution** for finance-led planning that leverages your Microsoft Dynamics 365 Business Central general ledger and trial balance data.

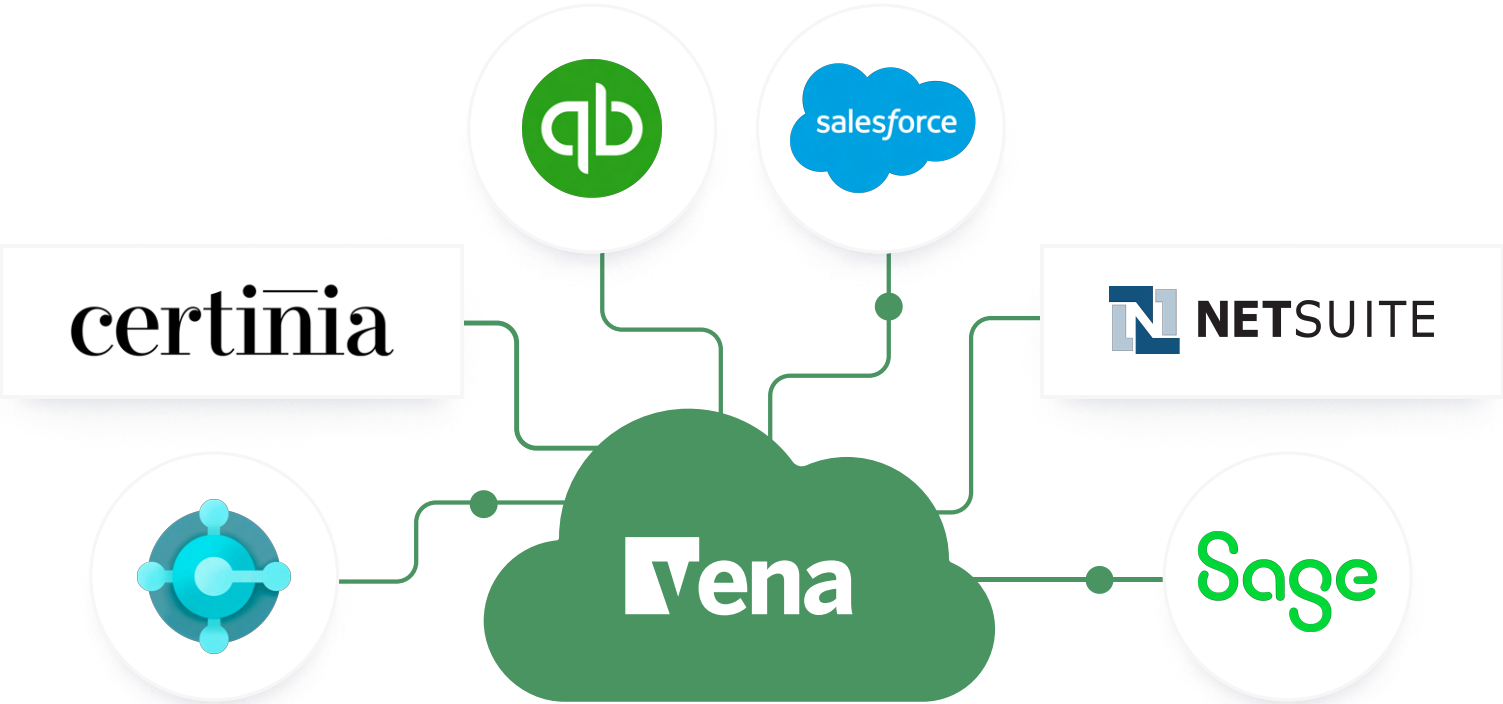

## Unlock the Potential in Your Business Central Data

---

Vena keeps processes like forecasting, modeling and budgeting in Excel—natively integrated in the Vena Platform—with **actuals powered by your up-to-date Business Central Data** to enable timely, accurate modeling, to share strategic insights across your business—**no learning curve**.

# Native API Connectors

- Salesforce
- Intuit Quickbooks Online
- Sage Intacct
- Netsuite
- Dynamics 365 Business Central (Beta)
- Certinia (formerly FinancialForce)

The screenshot displays the 'Add New Data Feed' workflow in two stages. The first stage, 'Select Connection', shows a progress bar with 'Select Connection' as the active step. It lists 'Business Central (created Aug 10, 2023)' as the selected connection, with a 'Create New Business Central' button. The 'Select Environment' section has 'Production' selected. The 'Select Company' dropdown shows 'CRONUS Canada, Inc.'. The second stage, 'Select Data', shows 'Trial Balance Data Feed' as the selected data source. The progress bar now shows 'Add Data Feed' as the active step. Navigation buttons for 'Previous: Select Source', 'Next: Select Data', 'Previous: Select Data', and 'Add Data Feed' are visible.
