Meet Every AP Professional's Best Friend

Dooap — The AP automation solution for D365 Finance

Factsheet

Cloud-native AP automation

Dooap is a cloud-native accounts payable automation solution built specifically for Microsoft Dynamics 365 Finance and Supply Chain Management.
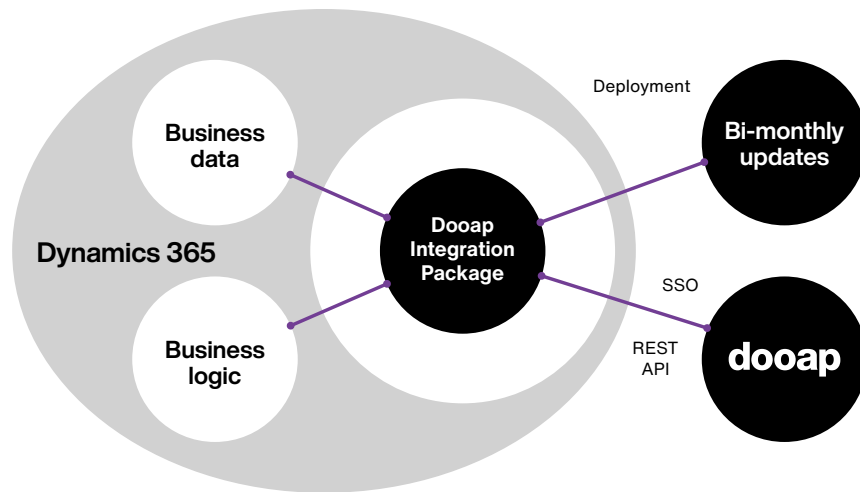

Azure Cloud

Dooap is a SaaS solution delivered from the Microsoft Azure Cloud that integrates seamlessly with your Microsoft Dynamics ERP system.

Its modern technology stack (Azure, .NET Core, Machine Learning) and agile development methods ensure the best user experience with all the functionalities your organization needs.

Solid design principles

Our design principles have always revolved around usability, performance, and transparency, giving you complete visibility and control over your AP process.

Business data

Dynamics 365

Business logic

Dooap Integration Package

Deployment

Bi-monthly updates

SSO

REST API

dooap

Core Features

Multiple invoice capture options
Dooap Capture (Self-learning OCR)
Capture as a Service (includes human validation)
Electronic invoices (XML, EDI, vendor portal)

Seamless integration with D365 Finance
All master data synched with D365 Finance
Account structure validation
Automatic PO matching based on Dynamics setups (2-/3-way matching)

Customizable and visual approval workflows
Dimension or Position hierarchy based approval matrix
Approval groups and delegations
Security classified invoices

Workflow and coding automation
Machine Learning generated coding
Machine Learning assisted workflows
Flexible and customizable templates

Intuitive user interface
Easy mobile and desktop apps
Everything you need in a single view
Machine Learning suggestions for users

Power BI analytics and reporting
Daily monitoring and cross check
Process performance KPIs
Fraud Detection
Month-end closing reports out of the box

Authentication

End-users log in to Dooap with the same credentials they use to log in to D365 Finance and Microsoft 365 (Azure AD). Single sign-on (SSO) is supported, and only users created in Dynamics can log in to the Dooap application.

Deployment and Integration

Right out of the box, Dooap is seamlessly integrated with D365 Finance – leveraging all the data already in place and aligning with all Dynamics business logic and rules. With Dooap, there is no need to build any integrations.

The Dooap package is fully independent and will not conflict with other D365 Finance modifications or vertical solutions. Dooap has dedicated custom APIs in D365 Finance, and the integration messaging is based on modern, real-time REST calls. No batch jobs are needed. Dooap is backward-compatible with three previous D365 versions. The latest Dooap integration package is provided bi-monthly.

Deployment Options

- Dynamics 365 Finance & Supply Chain Management (Azure and On-Premises)
- Dynamics AX 2012

Exceptional Technologies, Outstanding Performance. All you need is:

- D365 Finance or AX 2012
- Azure Active Directory
- Supported browser (Chrome, Edge)
- Supported mobile device (iOS, Android)

Dooap Mobile App

Dooap's top-of-the-line native mobile application is available on iOS and Android. Dooap mobile authentication works through Azure AD, providing secure communication between Dooap and D365 Finance. Our mobile application features a desktop-like experience, from invoice review and approval to coding and workflow management.

Dooap's simple and intuitive mobile app makes it easy for all users to approve invoices on the go with a simple 'swipe right' feature.

Microsoft Azure

The full-stack technology within Microsoft Azure's cloud platform enables Dooap to build, deploy, scale, and manage the application effectively across a global network of Microsoft data centers. Dooap leverages the enterprise-grade scalability and security provided by Microsoft Azure and third-party services via Azure.

- All the selected Azure technologies are generally known and tested, allowing full scalability for Dooap.
- All customer data is stored securely in Azure in a customer-dedicated database.

Dooap utilizes Microsoft Power BI to deliver insights on your accounts payable process. Dooap uses Machine Learning for workflow and coding automation, working in real-time to improve probable handling options as your processes evolve.

Available on AppSource

Dooap is a Microsoft certified solution, selected for its quality, performance, and ability to fulfill the required compatibility criteria determined by Microsoft.
